higher than the best price the previous day. Higher markets in the eastern packing centers and the light receipts were the cause of the big reaction acrowdered with the packers seemed to have made up their minds when they were buying good hoss for \$5.50 that the figure six was forever banked from the figure six was forever banked from the figure six not only came back, but hogs sold is cents over the back was about the back is the chief receipts was the chief responds the back but hogs sold in the chief responds the back was banked to back but hogs sold in the chief responds the back was being about to trade; how at the chief responds to the chief responsible for about one-half the nd- cans, 14c. The top price was \$6.15, against \$5.50 the previous day. The hogs which brought the top price yesterday were worth a nickel more than the tops on Wednesday, which shows that the market yesterday was 20 cents higher at the pf hogs on the mirket. If was only natural that this condition should cause a halt in the downward tendency of the market, if not a very decided reaction. It was the opinion of some of the people about the stock wards that armour would call in his buyer when the new blood house opened for business, but Armour teems to have come to stay and there is a strong probability that the new pucking houses at Fert Werth will have buyers here fust as soon as they learn that they cannot turn thet hogs to Fos Worth. Wichita is in the center of the great hogs producing section west of the missoult river and if is the natural place for the great western market. The farm being for the great western market. The farm while out to the same as yesterially, bolly waliace, John Garrett and Charley, Sharp will soon be out in the country. Sharp will asked by the first the probability of the southwest. Passe that it is not a s ses and country shippers very well know that one big central market is better for them, and when Wichita, Kansas City and Fort Worth packers compete for the hogs here. Wichita will be a red hot hog market.

Cattle.

The supply of cattle on the market year ternay was the injected of the week and while some of the buyers and sellers quoted the market lower, perhaps partially from force of habit, yet it was characterized by great activity. Stockers and feeders seemed to be easily sold and aft to scot brought \$65 and 15 L, and from these prices down. Butcher cown and helfers were it small supply and much under the dumand.
